

SCI Solutions Completes Fiscal Year with Record New Contract Sales

Web-based Access Management Company Celebrates Milestone Ten Year Anniversary

Los Gatos, Calif., December 8, 2009 – SCI Solutions, the [premier Access Management solution](#) provider for healthcare, today announced it has completed its 2009 fiscal year with another record-setting sales period. SCI Solutions signed 51 new customer contracts representing 76 hospitals, for its award-winning Access Management Solutions: [Order Facilitator®](#), [Schedule Maximizer®](#) and [Revenue Accelerator®](#). Schedule Maximizer is an Internet-based, enterprise Access Management solution that combines sophisticated workflow technology to streamline a hospital's complex patient and resource scheduling requirements. Order Facilitator is an Internet-based web solution for automating outpatient orders for hospital services from community physicians. Revenue Accelerator is a revenue cycle workflow system that streamlines pre-registration, prepares patients for arrival and expedites service delivery.

Founded in 1999, SCI Solutions, then known as scheduling.com, brought web-native technology and a dramatically new business model to healthcare. With a focus on improving the increasingly complex nature of scheduling healthcare services and procedures, SCI was the first to offer effective, mission-critical, enterprise solutions via the Internet. Over the past ten years, SCI has demonstrated how a focus on efficient, effective, patient access processes can generate significant benefits for integrated delivery networks and healthcare communities. SCI's current customer base is comprised of over 370 healthcare delivery systems dedicated to improving customer service, maximizing resources, ensuring accurate data collection, and improving overall access to care.

According to Cindy Dullea, SCI's Senior Vice President of Marketing, "Our customers have provided many compelling success stories over the past ten years." She continued, "From themes like the Ritz-Carlton approach to healthcare, to One-Call for All (Centralized Scheduling/Insurance Verification) to Winning the Love and Satisfaction of your Patients and Physicians using self-scheduling Portals, SCI's products are clearly meeting and exceeding the goals of our customers."

"I am proud to represent SCI's talented employees and our progressive healthcare customers who are truly dedicated to promoting Access as one of the most important areas in hospital management," commented John Holton, CEO SCI Solutions. He continued, "During the past ten years we have collectively transformed healthcare access management and revenue cycle processes with our advanced applications and workflow solutions".

About SCI Solutions

[SCI Solutions](#) is transforming healthcare Access Management with products and services that facilitate the efficient and secure exchange of clinical and financial information between patients, physicians and healthcare facilities. SCI provides a variety of products and self-service portals that help physicians and patients interact easily and at their convenience for many of their access-related needs. From a hospital's clinical departments, to its financial executives, to its physicians, SCI improves their effectiveness while making the patient's service experience first class.
