

## SCI Solutions releases Schedule Maximizer® Version 34

*SCI's continued innovation empowers patients and providers to make intelligent choices*

Campbell, Calif., January 3, 2012—[SCI Solutions](#), today announced the release of a new version (v34) of its powerful, rules-based, enterprise scheduling solution, [Schedule Maximizer®](#).

Schedule Maximizer® Version 34 continues SCI's commitment to helping hospitals increase revenue while improving patient and physician satisfaction. This release offers rich new revenue management functionality and capabilities to satisfy applicable HITECH Meaningful Use requirements. Example features include: patient address and identity verification, patient propensity for payment, expanded support for multiple diagnoses, industry-leading functionality utilizing SCI Power Access™ to integrate an HL7 Order message from a community office EMR via Schedule Maximizer® to the health system EMR, and enhanced search functionality. The update also includes multiple enhancements to SCI's Arrival Manager™, including patient payment, status pane tracking of patient activity and insurance indirect updates. More information can be found by visiting [www.scisolutions.com](http://www.scisolutions.com)

"As health enterprises seek to become patient centered and new payment models introduce incentives to manage escalating health costs, a community-wide care coordination ability that can intelligently align providers and health resources based on patient conditions or care episodes becomes essential," said Joel French, managing partner and CEO of SCI Solutions. "Schedule Maximizer® v34 continues SCI's heritage of delivering innovations that improve efficiency and convenience for patients, physicians and hospitals. It allows patients to understand their financial responsibility prior to care and enables providers to be assured of reimbursement and avoid costly write-offs."

### **About SCI Solutions**

SCI's patent-protected revenue management solutions enable clients to increase revenue and cash flow, optimize resources and physician referral patterns all while improving patient satisfaction. SCI's advanced rules and workflow engines strengthen alignment with both employed and independent community providers, achieving secure clinical and financial information exchange among providers regardless of their EMR vendor, technology or level of automation.

SCI's Clinical Integration Engine™ intelligently orchestrates patient care across communities based on condition, episode and population health — aligning reimbursement with clinical appropriateness and compliance. This level of rich electronic and economic integration with community providers, patients and plans leads to market advantages and other quantifiable benefits including:

- Incremental referrals/orders from non-employed community physicians
- Reduced out-of-network revenue leakage from employed or acquired physician practices;
- Lower re-admission rates by electronic integration of patient discharge management, ordering, scheduling and follow up patient compliance; and
- Fewer health plan denials and underpayments through verification of medical necessity, authorization and additional front-end revenue management checks.

Founded in 1999, SCI is headquartered in Campbell, CA, with professionals throughout the United States and offices in Atlanta, Pensacola, Seattle and Tucson. For more information about SCI Solutions visit [www.scisolutions.com](http://www.scisolutions.com).
