

SCI Solutions Launches New Version of Schedule Maximizer (v32)

Access Management Vendor Enhances Rules-based Enterprise Scheduling, Expands Revenue Cycle functionality

Los Gatos, Calif. – January 6, 2010 – [SCI Solutions](#)[®], the premier Access Management solution provider for healthcare, today announced the release of a new version (v32) of its powerful, rules-based, enterprise scheduling solution, Schedule Maximizer[®].

[Schedule Maximizer](#) (v32) includes numerous revenue cycle boosting enhancements, including:

- Email Appointment Reminder Confirmation, which expands SCI's Appointment Reminder functionality to confirm to the user when a booking event or request occurs
- Expanded functionality in SCI's Consumer and Physician self-scheduling portals
- Revenue cycle focused reports:

Worklist – a statistical report for the number of worklist items by assigned users, worklist statuses and worklist names.

Medical Necessity – a statistical report on the number of Medical Necessity checks and their statuses.

Additionally, Schedule Maximizer (v32) includes enhancements to its operational reports, Spanish language capabilities (i.e., ABNs, prep notes, directions and email disclaimers) as well as expanded functionality of the Compare/Merge tool which enables management of duplicate patients without the expense of a full EMPI.

According to Kristy Roesner, SCI's SVP of Product Development, "It is a testament to the work ethic and commitment of SCI's Development Team that Schedule Maximizer (v32) released six days earlier than originally scheduled." She continued, "We are proud of this version's updates as they represent specific customer requested features that enhance and expand its overall capabilities as a revenue cycle process improvement tool."

"SCI is fully committed to partnering with our customers to improve their patient access and revenue cycle processes," commented Julie Haas, SCI's SVP of Customer Operations. She continued, "The enhancements provided in Schedule Maximizer (v32) were the direct result of customer feedback and our collective understanding that Access is one of the most important areas in hospital management."

-more-

SCI Solutions, through its Software as a Service (SaaS) model, provides a full complement of front-end patient access and revenue cycle tools that include comprehensive enterprise scheduling and registration, sophisticated workflow to manage a hospital's orders, scheduling and pre-encounter revenue cycle requirements. Additionally, SCI provides customer self-service solutions that help physicians and patients interact seamlessly with your organization for all their access-related needs. SCI's Access Management offerings fall into the following categories:

- [Order Facilitator®](#)
- [Schedule Maximizer®](#)
- [Revenue Accelerator®](#)
- [Consumer Portal](#)
- [Provider Portal](#)
